

in.k1000+ full-featured touch screen display keypad

The perfect balance of art and technology now with an olympic level training program for swim spas.

A touch of engineering magic!

Gecko's new version of its in.k1000 capacitive touch screen display keypad boasts a new state of the art touch screen with more precise fingertip contact areas for accurate target selection, enabling easier and more precise interactions.

in.k1000+ features optimal water resistance and lots of memory.

Now with your own personal swim coach!

With its swim spa training program, in.k1000+ can transform any swim spa into the ultimate training machine. Directly on the keypad, training sessions can be customized by setting flow intensities, durations and color indicators. Pre-sets Lap, Transition, Cardio and Power drills can also be selected and customized to match any training needs.

in.k1000+ can now control multiple 2 speed pumps and synchronize the jets to create the wide selection of water stream strengths a swimmer needs for serious training.

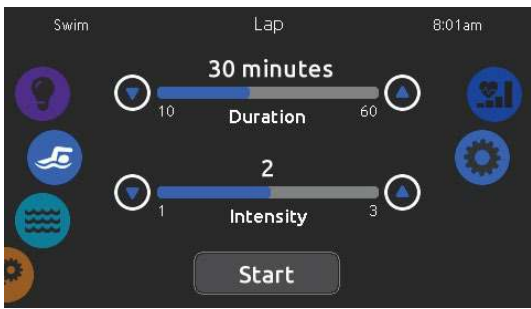

Now connects to the Internet of Things!

in.k1000+ can access the internet through its in.touch 2 connection, making your spa an integral part of the Internet of Things.

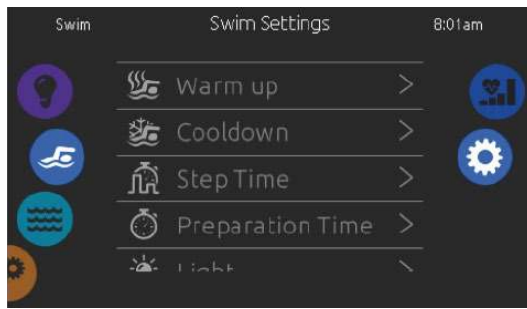

in.k1000+ for swim spa

now with your personal olympic level swim coach

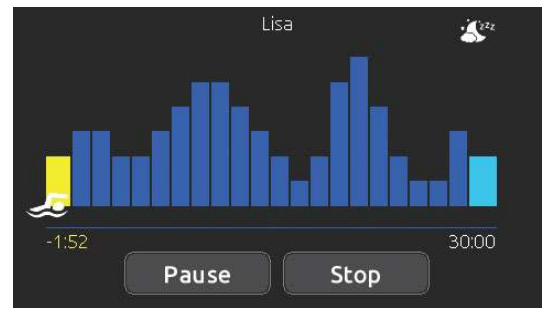

main interface

Select drills, set durations, intensities and more with the touch of a finger on an interface designed for swimmers.

swim settings

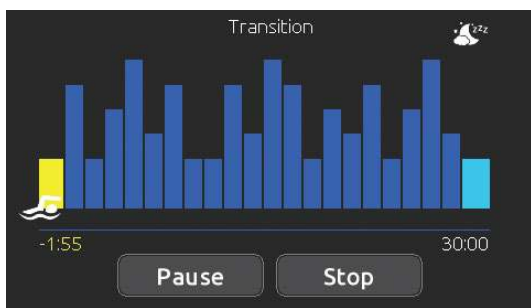

Many parameters can be configured to fit your training habits; warm up, cooldown, step time, preparation time and lighting.

custom

You can customize your training session. It's as easy as dragging your finger on the screen to draw the pattern of your choice and save it under your name.

pre-programmed drills

5 pre-programmed drills are readily available for you to choose from. Select the one that fits your training needs. Our Power drill improves your overall swim performance. Selecting transition drill allows you to switch between butterfly, backstroke and breast stroke to improve technique and solicit separate muscles. The Cardio drill is a fast-paced, heart-pumping exercise plan that burns calories and builds muscle. Choosing Lap drill alternates high-intensity periods with low-intensity recovery periods for quick calorie burning. The Endurance drill allows you to concentrate on technique and consistency.

in.mix 300 integration

Colored light visual aids assist you during your training like a coach would do!

Blinking and steady lights inform the swimmer on changes of pace and styles throughout his training.

Swim jets configuration

in.k1000+ combined with the Y series pack gives you the flexibility and latitude to configure your swimming propulsion to fit with your plumbing and propulsion jets. We can configure up to 4 pumps, combining 1 and 2 speeds to create the number of intensities you desire. This configuration is done through the low level of the Y series pack.

The table illustrates a configuration with 3 two-speed pumps that achieve 5 levels of intensity.

Pump state chart

Intensities	P1	P2	P3
1	Low	—	—
2	High	—	—
3	Low	Low	Low
4	High	Low	Low
5	High	High	High
